**CEILING DAMPERS - FUNCTION AND APPLICATION**

This ceiling damper is used to provide the required fire and heat radiation protection of HVAC penetrations of Floor-Ceiling and Roof-Ceiling Assemblies having a Restrained or Unrestrained Assembly Fire Resistance Rating of 2 hours or less, in accordance with UL-263. Standard Fire Dampers ( $1^{1/2}$ -hr. & 3-hr.) do not provide the necessary heat radiation protection. Ceiling Dampers are also called Ceiling Fire Dampers, Radiation Dampers, and Radiation Shields. See Louvers & Dampers, Inc.'s UL-approved Installation Instructions for various installation requirements and procedures. Approved Ceiling Designs are illustrated by Design Number in UL's *Fire Resistance Directory*.
